Shortlist / visual selection after diagnostic screening

Same data and geometry | white background | LAYOUT TEST - synthetic values

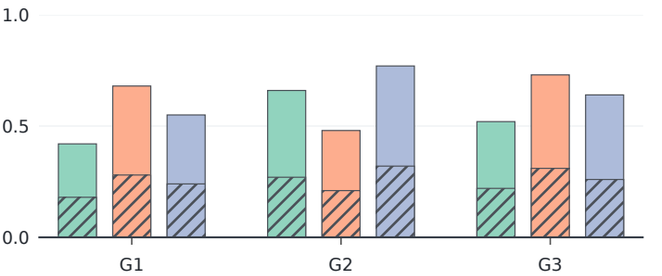

P002 Set2 a=0.72

5 series / grouped / prefer 3 series

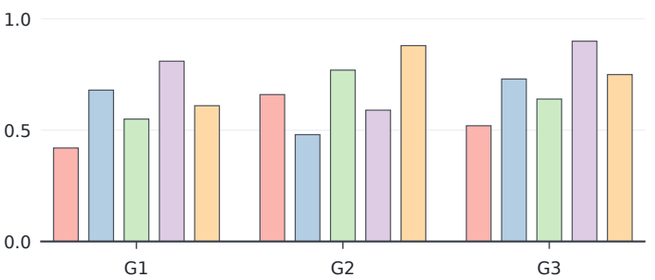

P002 Set2 a=0.72

3 series / lower region hatched

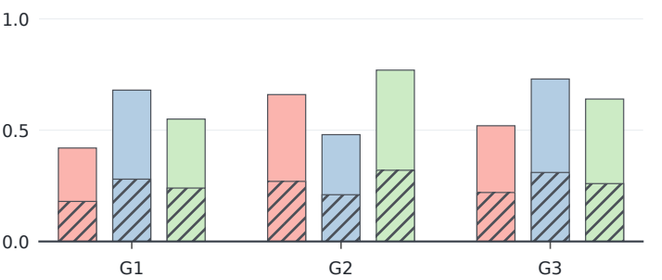

P015 Pastel1 a=1

5 series / grouped / prefer 3 series

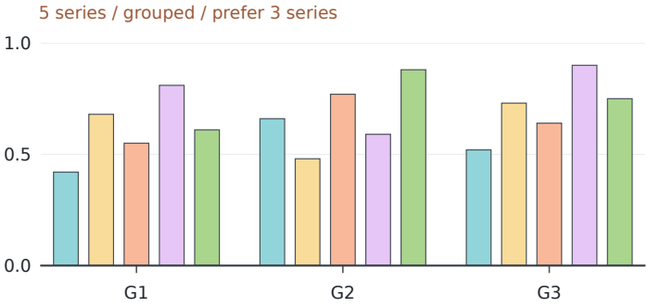

P015 Pastel1 a=1

3 series / lower region hatched

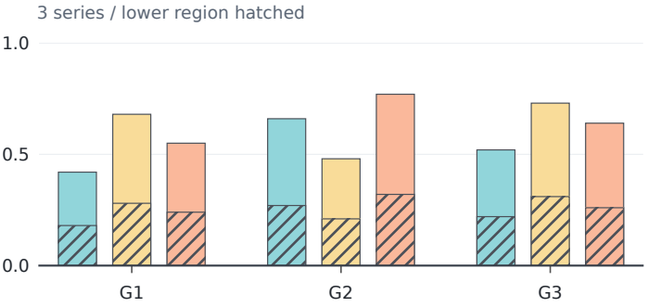

P022 Pastel a=0.72

5 series / grouped / prefer 3 series

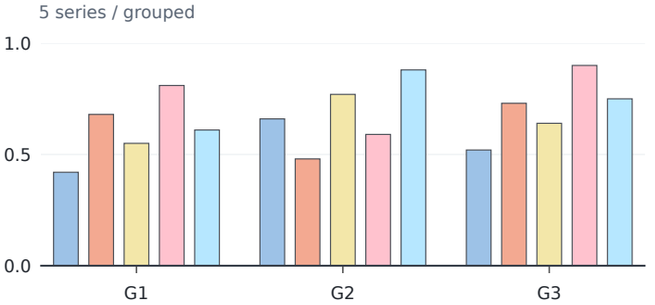

P022 Pastel a=0.72

3 series / lower region hatched

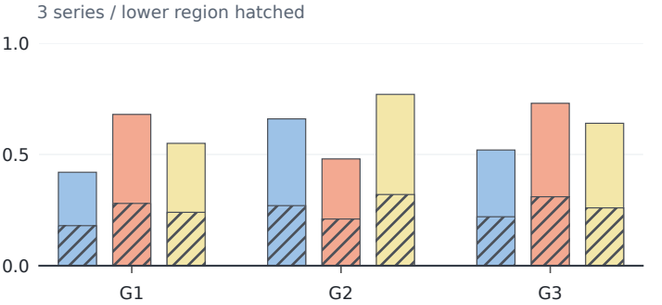

P040 light a=0.72

5 series / grouped

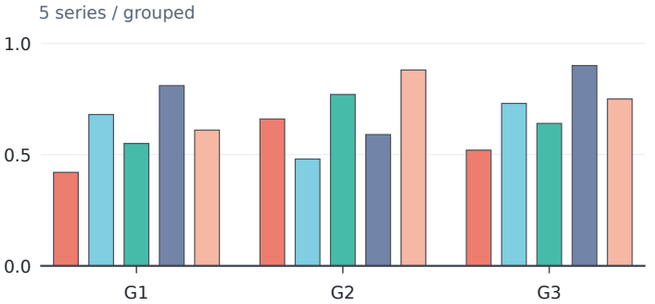

P040 light a=0.72

3 series / lower region hatched

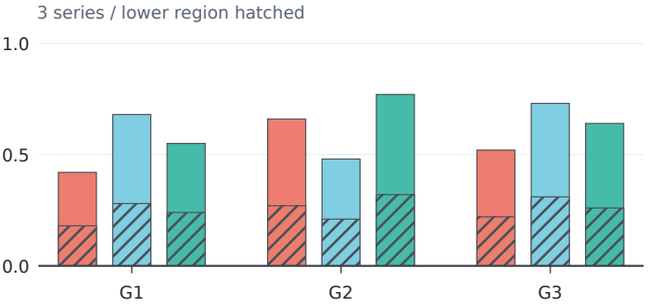

P026 NPG a=0.72

5 series / grouped

P026 NPG a=0.72

3 series / lower region hatched

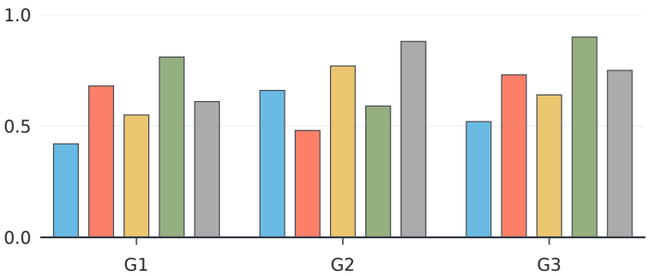

Colour distance is a diagnostic, not a beauty score. Lower hatching: independent overlaid heights.

Shortlist / visual selection after diagnostic screening

Same data and geometry | white background | LAYOUT TEST - synthetic values

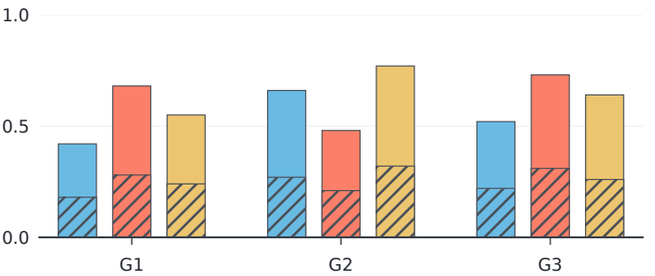

P098 glasbey_hv a=0.72

5 series / grouped

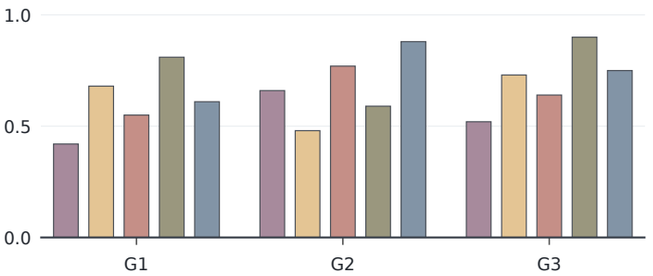

P098 glasbey_hv a=0.72

3 series / lower region hatched

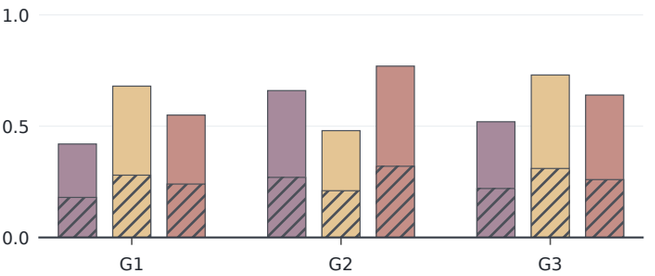

P018 Antique a=0.72

5 series / grouped / prefer 3 series

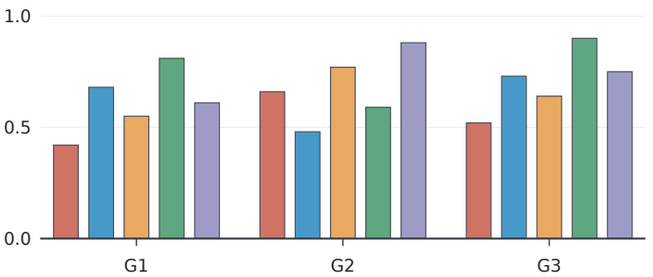

P018 Antique a=0.72

3 series / lower region hatched / hatch needs adjustment

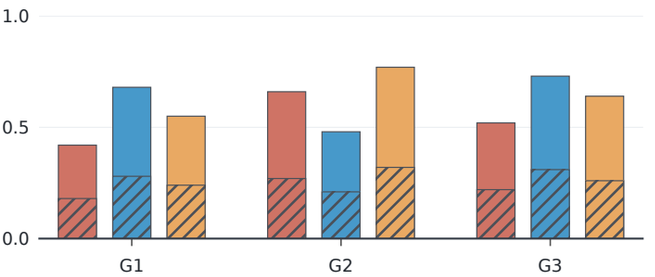

P086 NEJM a=0.72

5 series / grouped / prefer 3 series

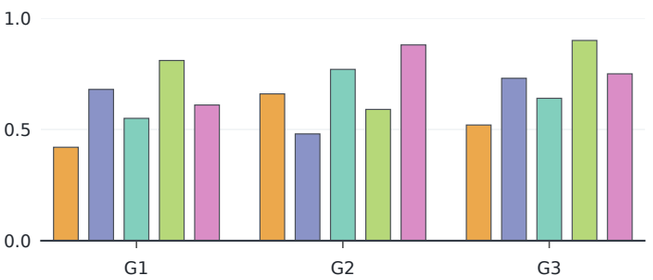

P086 NEJM a=0.72

3 series / lower region hatched / hatch needs adjustment

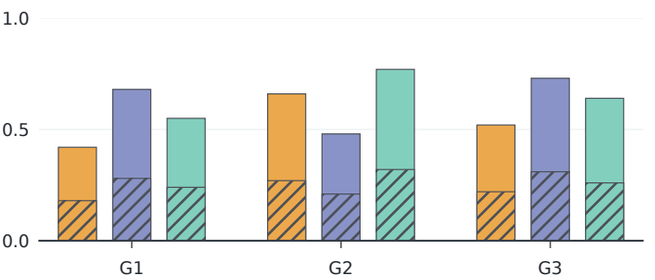

P028 Vivid a=0.72

5 series / grouped / prefer 3 series

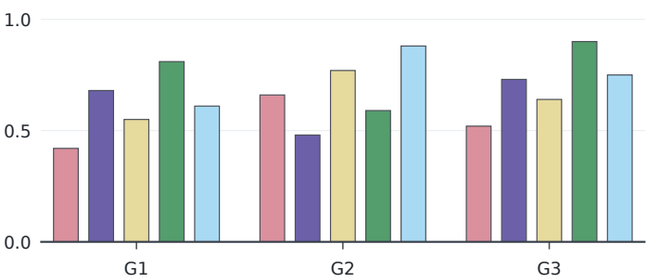

P028 Vivid a=0.72

3 series / lower region hatched / hatch needs adjustment

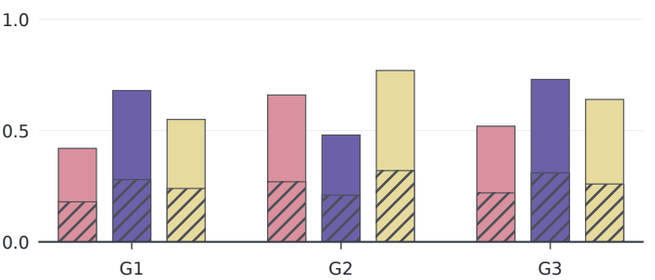

P034 muted a=0.72

5 series / grouped

P034 muted a=0.72

3 series / lower region hatched / hatch needs adjustment

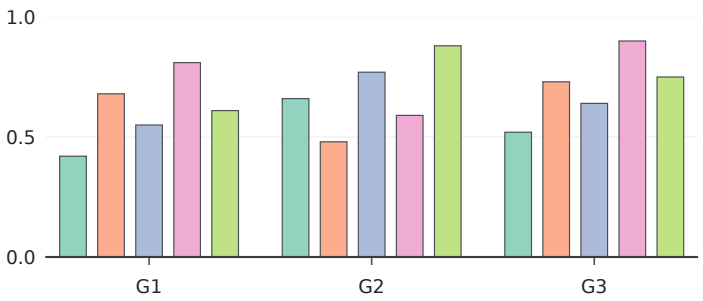

Colour distance is a diagnostic, not a beauty score. Lower hatching: independent overlaid heights.
